To Whom It May Concern:

I am very pleased to recommend Ron Zander and Natural Environements to anyone considering his residential landscaping and lawn maintenance services. Working with Natural Environents for more than eight years, Ron and his team have been an invaluable asset to the care of our home in ways that we could not have predicted when we began working together.

Ron's creativity and keen eye for exquisite garden landscaping is unmatched. Most guests to my home comment on the unique and welcoming look that he created for our home. But I soon learned that his talents and expertise reach far beyond landscaping and maintenance.

Ron was instrumental in solving many problems on property, from proper drainage and foundation issues, to design and resurfacing of our patio and pool. He got to know my home and yard better than I did, and I always appreciated his accessibility and quick response anytime he was needed. Living on property with many old and tall trees, I could always count on a call from Ron following a storm, just to check in to see that all was well – a very kind gesture in a world where personal service is hard to find.

Ron and his team are a talented, resourceful and delightful group to work with, and I would recommend them to any homeowner in need of their services.

Lisa Siegel
